

# THE DE LAVAL SEPARATOR COMPANY

POUGHKEEPSIE, NEW YORK

January 18, 1962

Mr. Edward Sweeney, Dist. Sales Manager  
H. E. Morse Co.  
Milford, Conn.

Dear Mr. Sweeney,

During the past four years we have purchased several of your chrome plated plug and thread gages. I would like to compliment you and your company both on the gages themselves, and service we have received.

A large portion of our machining is on stainless steel which as you know is very hard on gages. In one instance, using your chrome thread plug, gaging a 1-5/16-18 spud, we have attained a gage life four to six times greater than a conventional steel gage. Your plug gages are also very durable and do not chip.

It is a pleasure to do business with a company whose guarantee means what it says.

Sincerely,

John T. Kane,  
Gage Inspector.
